

**Conway Tornado Relief Fund:**

On February 25, 2017, a category 1 tornado touched down in several places in the small town of Conway, MA (population 1,900). Winds were clocked at 80-110 miles per hour. Although no one was injured and there was no loss of life, thousands of trees were downed, roads were blocked, and the Conway Congregational Church and more than six residences were severely damaged. Town, county, and state agencies and individuals have worked around the clock to check on residents, open roads, assess damage, and start the clean-up process.

A GoFundMe fundraising website has been set up to respond to the outpouring of people asking how they can help the church and the residents who were impacted by the storm. Conway's Firemen's Auxiliary will manage this fund with input from town officials.
